DETAILED ACTION

Response to Amendment

Amendment filed 9/29/05 forms the basis for this office action.

Information Disclosure Statement

The examiner has considered the items listed on the Information Disclosure Statement filed 7/25/05. A signed copy of Form PTO-1449 is herewith enclosed.

REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: claims 1-4 and 6-17 are allowed.

Within the context of the invention as defined by claims 1, 12 and 15 neither the average particle size of the blue color light emitting fluorescent material, nor the average particle size of the red color light emitting fluorescent material nor the average particle size of the green color light emitting fluorescent material have been found in the art, sizes being substantially distanced from the claimed ranges. Neither has art been found that would render the claimed ranges for the average particles sizes as claimed obvious. Particle size influences cross section and hence light output.

In addition to Jüstel (6,084,250) and references supplementing Jüstel as cited in the previous office action, Maeda et al (US 2004/0104391 A1) is closely related art. However, Maeda et al do not teach blue, green and red converting layers in the claimed order, nor a claimed range for the red or green color converting layer material particles overlapping with the ranges as claimed.
